DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Olejniczak (US 2,542,561) in view of Busby (US 1,751,393).

Olejniczak discloses a level instrument including of the following:

a) a main body frame (3) that is to be arranged along a vertical face to be measured (column 13, lines 10-13), the main body frame having a first end and a second end (Fig. 1); and a reference arm (13,19) connected to the first end of the main body frame so as to be perpendicular relative to the main body frame (Fig. 1); and a telescoping arm (14, 28) connected to the second end of the main body frame so as to be perpendicular relative to the main body frame (Fig. 1), wherein the reference arm and the telescoping arm extend in the same direction from the main body frame and are adapted to contact the face to be measured (Fig. 1), and wherein the said telescoping arm has a scale (12) and a bubble gauge (31) for determining a level of the telescoping arm (Fig. 1), wherein during an inclination measurement, the telescoping arm is adjusted so that the telescoping arm is level as indicated by the bubble gauge (Fig. 1);

Art Unit: 2859

- b) wherein said the bubble gauge determines a level of the telescoping arm in a telescoping direction (Fig. 1);
- c) wherein the said bubble gauge determines a level of the telescoping arm in a direction perpendicular to a telescoping direction (Fig. 1);
- d) wherein the said bubble gauge determines a level of the telescoping arm in a direction perpendicular to a telescoping direction (Fig.1);
- e) wherein the said bubble gauge can be observed from both upper and under sides of the telescoping arm (Fig. 1);
- f) further comprising a driving mechanism (29) that drives a telescoping operation of the telescoping arm (Fig.1);
- g) wherein the said driving mechanism converts a rotary movement of a rotating member into a telescoping movement of the telescoping arm (Fig.1);
- h) wherein the said reference arm is provided with a protrusion (36) on a portion to be in contact with the face to be measured on an outer side of the main body frame (Fig.1);
- i) wherein the said main body frame is provided with a bubble gauge (21) for determining a level of the main body frame (Fig. 1);
- j) wherein when the telescoping arm becomes level as indicated by the bubble gauge, the inclination of the face to be measured is indicated by the slide scale (12) on the telescoping arm (Fig.1).

Olejniczak does not disclose a slide scale that is movable by telescoping a telescoping arm.

Art Unit: 2859

Busby teaches a level gauge that includes a slide scale (19) that is movable by

Page 4

telescoping a telescoping arm (Fig.3). Therefore, it would have been obvious to one having

ordinary skill in the art at the time the invention was made to further modify the level instrument

of Olejniczak, so as to include a slide scale that is movable by telescoping a telescoping arm, as

taught by Busby, so as to provide additional measurement accuracy during measurement of a

surface.

Response to Arguments

Applicant's arguments filed on September 29, 2006 have been considered but are moot in 3.

view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure.

The prior art cited on PTO-892 and not mentioned above disclose a measurement device:

Armstrong (US 4,939,848)

Hoffman et al. (US 4,413,420)

Pavitt (US 4,271,599)

Weiss (US 3,190,008)

Posthauer, Sr. (US 2,743,528)

Kleineschay (US 2,154,625)

Shaw et al. (US 1,719,812)

Art Unit: 2859

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tania C. Courson whose telephone number is (571) 272-2239. The examiner can normally be reached on Monday, Wednesday and Thursday from 10AM to 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Diego Gutierrez, can be reached on (571) 272-2245.

The fax number for this Organization where this application or proceeding is assigned is (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

Application/Control Number: 10/532,798

Art Unit: 2859

798 Page 6

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
